

Future Proof Packaging.

Eco Premium[®] Range.

Tree-Free, Compostable, bio-degradable food packaging. Unique visual solutions, tactile, functional and socially responsible. Using moulded 3d forms and shapes to shift your customers ideas about a product range or brand, via distinct tactile products all Love Trees designs, utilize bio-pulp to ensure no tree pulp or petrochemicals enter the production process. This means renewable material sourcing, less emissions during production, lower impact after use, and helps the drive for greater reliance on sustainable manufacturing practices. With vision and belief you can get on board to make the change to a sustainable future with us.

Range.

These funky, durable products developed for large scale franchise and premium stadium/restaurant use, for any business wishing to stand-out from the crowd. Visually striking, angular or organic, with a focus on higher gram weight items that have been developed for a range of single and combination food service uses.

Benefits.

These products require no coatings, bleaching or additional production processes and perform under the most testing of food service conditions. Premium grade material for better durability, stacking and toughness during service, in transit and when reheating.

Ordering & Delivery.

Delivery surcharges may apply for smaller, regional and interstate deliveries. For full terms and conditions contact Love Trees Project.
