

Future Proof Packaging.

Eco Basics[®] Range.

Tree-Free, Compostable, Bio-degradable, food packaging. Unique visual solutions, tactile, functional and socially responsible. Using moulded 3d forms and shapes to shift your customers ideas about a product range or brand, via distinct tactile products, all Love Trees designs, utilize bio-pulp to ensure no tree pulp or petrochemicals enter the production process. This means renewable material sourcing, less emissions during production, lower impact after use, and helps the drive for greater reliance on sustainable manufacturing practices. With vision and belief you can get on board to make the change to a sustainable future with us.

Range.

Designed for functional simplicity these items are popular for independent businesses seeking small order volumes. If you want the premium feel and durability of moulded bio-pulp products without the overheads, eco-basics is a great place to start.

Benefits.

Tree Pulp Free. Annually Renewable + Ecologically sustainable material sourcing. Recyclable, Compostable, bio-degradable, reclaimed pulp that requires no coatings, bleaching or additional production processes to perform well in hot and cold food service conditions.

Ordering & Delivery.

Delivery surcharges may apply for smaller, regional and interstate deliveries. For full terms and conditions contact Love Trees Project.
